

## **2013/2014 Budget Passed by City Council – Reduction in Tap In Fees Announced**

At the May 20, 2013 Council Meeting, the proposed 2013/2014 Budget was passed. It is a balanced budget. One of the key issues that came out of this year's budget planning sessions was the decision to reduce water and sewer tap in fees for new construction sites from what was previously approximately \$10,000.00 to approximately \$5,000.00. The 50% reduction in these fees represents a significant incentive to attract new development within the City. There have already been seven new applications submitted under these reduced fee schedules. For additional information on these fee reductions, contact Ms. Sherry Steinwedel or Mr. Robert Grostick at 734-439-1501.
